May 30, 2006, EDMOND, OKLAHOMA. WeatherBank, Inc., a leader in the weather services industry, announced today that it has purchased and installed new, GOES Satellite Receiving Systems from GTI Electronics, of Whitehall, PA. The two systems (one for GOES East data and one for receiving GOES West data) have been installed at the Company's Edmond, Oklahoma facilities.

Steven Root, WeatherBank's President and CEO, stated the new platforms are producing a variety of high-resolution imagery from both the GOES East and West satellites, and the images are displayed over the Company's WeatherBrief[®]-NET, WeatherBrief[®]-FTP, WeatherBrief[®]-XML, and WeatherBrief[®]-SATELLITE Services.

Root added, "WeatherBank's automated routines are placing images over maps of the Northern Hemisphere (East and West), the continental United States, regions of Canada, and individual States." He further stated that, depending upon the area of coverage; images are updated as frequently as several times per hour. "The user will quickly realize the value that these high-resolution images will afford," Root stated.
